

# Managing Conflicting and Competing Objectives

Roman Slivka, PMP®

# Agenda

- Problem statement
- Managing dilemma
- Whole brain thinking
- Seven Keys To Success
- Closure

A man and a woman in business attire are sitting at a table, looking at papers and laptops. The man is on the left, wearing a grey suit and a blue tie. The woman is on the right, wearing a grey sweater over a white collared shirt. They are both looking down at the papers on the table. The background is a bright office with large windows. The text "Is it the problem?" is overlaid in the center in a large, bold, red font.

**Is it the problem?**

**Is it our (PM) problem?**

**HOW ABOUT NO**

quickmeme.com

## Dilemma

- Can't be solve
- **Must be MANAGED**

# What is the Dilemma

- The Dilemma is a situation where two, or more, seemingly opposing conditions exist AND both (or more) must be responded to (e.g. we need to increase skills of our PMs, and we need to reduce our education budget)
- Unlike the problem that can be solved, a dilemma can only be managed.

# Managing dilemma Your PM Role

- Do you feel frustrated by competing conditions?

# Managing dilemma Your PM Role

- What you can do with dilemma?

# Managing dilemma Your PM Role

- Flipping perspective

# Managing dilemma

## The methods

### Articulate the dilemma

- Using “AND” to articulate dilemma

### Respect the opposite conditions

- Rational of both

### See the dilemma as opportunity

- How this could be good for us?

### Generate innovative solutions

- Brainstorming, 2x2, Reframing

# Brainstorming

# Brainstorming

- Creative process
- Ideas are not judged, or evaluated at first
- Encourage break away (creative thinking)
- Buy-in for solution
- Target at least 20 ideas

# Reframing

- Asking powerful questions:
  - How might we manage this situation?
  - Why are these condition a good thing?
  - How could our perception of this situation be different?
  - How might our competitors solve this?

# How to articulate bad news?

Bad news – good signs

- Something is happening!
- Would they need me, if there would no be bad news?
- It's opportunity I can manage!

# Whole Brain® Thinking

Each of us use and absorb and process information in different way  
Understanding and appreciating different thinking style can change the way your interact with others.

# How to communicate with executives

## 1) Data and facts

Numbers, and consistency with details

## 2) Feeling

What do I feel, what I am afraid of.

## 3) Vision

Show what we can achieve

## 4) Plans

Specifics

What, when, who

Define what you need from them

Define ACTION

- Project health indicates the ability of a project to meet its stated objectives (from both a business and a customer perspective).
- Project health and project status are closely related, but different:
  - Project health focuses on emerging trends and unhealthy signs that may lead to problems in the future, if actions are not taken to address them.
  - Project status focuses on current results and performance against project plans.
- Project health is not only a matter of execution:
  - Most troubled projects were doomed to failure before their execution has even started: sponsor's expectations are unclear, project viability is overestimated, etc.
  - Projects may meet their technical and financial targets, but if they leave the customer / sponsor with a bad impression, they may ruin our reputation.

# Project health

## Seven Keys to Success™

The PM must ensure the health of **all** Seven Keys to Success™ not just Team, Scope, & Schedule, which are often a PM's primary focus.

**Stakeholders are committed**

**Delivery Org. Benefits are being realized**

**Business Benefits are being realized**

**Risks are mitigated**

**Team is high performing**

**Scope is realistic and managed**

**Work & Schedule are predicted**

# Project health

## What are the Seven Keys to Success™

- A framework to review and communicate project health at any stage of a project through seven dimensions
- A list of typical healthy and unhealthy signs within each of the seven dimensions
- A consistent basic terminology and agenda for project and Steering Committee meetings (versus an unending list of issues that no one can keep up on)
- Ultimately, a way of thinking that underlies the selection of the most efficient corrective actions against unhealthy signs

# Proposal to terminate program

	The 7 Keys	Issues	Status
Stakeholders are committed 	Stakeholders are committed	<ul style="list-style-type: none"> <li>- Lack of Business units involvement</li> <li>- Frustration caused by previous failures</li> <li>- Competency leadership not recognized</li> </ul>	
Business benefits are realized 	Business Benefits are realized	<ul style="list-style-type: none"> <li>+ Transparent evidence and audit able records</li> <li>- High expectations (one tool for everything)</li> <li>- Ongoing change requirements (additional compliance elements)</li> </ul>	
Work and schedule are predictable 	Work and Schedule are predictable	<ul style="list-style-type: none"> <li>- Only high level plans available</li> <li>- Project phases and quantifiable measurements poorly defined</li> <li>- Missing commitments from delivery organization</li> </ul>	
Scope is realistic and managed 	Scope is realistic and managed	<ul style="list-style-type: none"> <li>- Solution design not available (functional and non-functional requirements, performance criteria)</li> <li>- Scope is not in line with strategy</li> </ul>	
Team is high performing 	Team is high performing	<ul style="list-style-type: none"> <li>+ PMs are motivated</li> <li>- Overall leadership is not recognized</li> <li>- Teams in delivery centers not committed</li> </ul>	
Risks are mitigated 	Risks are being mitigated	<ul style="list-style-type: none"> <li>- Risk management is not in place</li> <li>- Main risks are not recognized and mitigated</li> <li>- Project is managed in an „ideal“ world</li> </ul>	
Delivery organization benefits are realized 	Delivery organization benefits are realized	<ul style="list-style-type: none"> <li>+ Project team is very enthusiastic</li> <li>- Troubled project</li> </ul>
